

Statement on Persistent Organic Pollutants (POPs)

Persistent Organic Pollutants (POPs) are organic substances that persist in the environment, accumulate in living organisms, and pose a risk to human health and the environment.

Regulation (EU) 2019/1021 on persistent organic pollutants implements the objectives of the Stockholm Convention at the European level. Replacing Regulation (EC) No. 850/2004, it establishes measures to eliminate reduce the production, use, and trade (including import and export) of persistent organic pollutants (POPs), in line with the EU's international obligations.

To the best of our knowledge and based on the information currently available to us, we confirm that our products comply with the requirements of Regulation (EU) 2019/1021 at the time they are dispatched from our manufacturing facilities. We have no control over, and therefore cannot assume responsibility for, any contamination or changes that may occur after shipment.

This statement is based solely on declarations from our suppliers and has not been verified through chemical analysis or destructive testing. This statement reflects the current state of our knowledge and experience. We reserve the right to update and modify this statement as needed.
