

## RoHS and REACH statement

Dear valued Aquametro Oil & Marine customer,

We are providing you the following information to assist you in meeting your environmental policies and procedures.

### RoHS 2011/65/EC

Aquametro Oil & Marine AG Declaration of Compliance to Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the "Restriction of Hazardous Substances in Electrical and Electronic Equipment (recast)" (RoHS2), and related amendments:

Aquametro Oil & Marine AG states that its products have been examined with respect to the above referenced EU directives, and to the best of our knowledge do not contain any of the listed concentration or substances. In preparing this statement, Aquametro Oil & Marine AG has reviewed information provided by our raw material suppliers, our own formulations and knowledge of our manufacturing processes enables us to warrant that we shall comply with the RoHS requirements.

### REACH 1907/2006

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) was first released. This Regulation establishes specific duties and obligations for companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles.

Under the structure of the REACH Regulation, Aquametro Oil & Marine AG is a manufacturer and supplier of products to our EU customers through several Aquametro Oil & Marine AG partners located within the EU. We do not manufacture or supply "substances" or "preparations" and our articles do not involve the "intentional release of substances". Therefore, we are not subject to the REACH registration or pre-registration requirement for the products we supply to you.

Aquametro Oil & Marine AG is constantly monitoring the substances of very high concern (SVHCs), as defined by REACH, in our products. This will be an on-going process since the complete list of SVHCs will be released in stages.
